Buenos Aires, Argentina & Remote • Résumé current as of April 30, 2022

Current Technology Stack

Fundamentals	Data structures and algorithms, OOP, TDD, SOLID, Git
Programming languages	JavaScript, TypeScript, HTML, CSS, C#
Frontend	Angular, OpenUI5, Redux, Cordova
Backend	Node.JS, Express, NestJS, TypeORM, Mongoose, .NET
DevOps	Linux, Docker, Kubernetes, Terraform, Jenkins

Employment

Avature, Senior Software Engineer	04/2022 - Present
sovanta AG, Senior Software Engineer	02/2019 - 04/2022
<ul style="list-style-type: none">- Working for multiple customer-facing projects, as a Frontend, Backend or Fullstack developer, according to demand needs.- I'm also on the DevOps team, where I contribute to cross-cutting concerns for all projects, such as deployment, infrastructure and operations.	
Accenture, Software Developer - Associate Manager	10/2015 - 02/2019
<ul style="list-style-type: none">• Rewrote in Node.JS/JavaScript a critical .NET/C# backend service, and migrated it from IaaS to an AWS Lambda based PaaS, without interrupting operations.• Integrated SAP IdM and Microsoft Dynamics by developing a custom interface using Rhino/JavaScript and OData when SAP did not offer a connector out-of-the-box.• Improved the performance of a webapp by implementing ElastiCache and ASP.NET tweaks, leading to a 60% reduction in page load times and a decrease in backend workloads.• Developed SAP Gateway OData services using ABAP to go-live in less than four months, without any prior ABAP experience.• Integrated Salesforce and SAP Finance by leveraging Azure Service Bus and developing an NServiceBus endpoint that handles 12K messages every day.	
Grupo Santillana, Software Development Team Lead	08/2009 - 10/2015
<ul style="list-style-type: none">- Led the group of developers who built a BPM solution to digitize critical business processes of the publishing group.- Contributed to the implementation of the Scrum agile framework, playing the role of ScrumMaster.- Guided the adoption of software engineering practices such as TDD and Continuous Integration.	
CDA Informática - Client: Telecom, Software Developer	02/2009 - 08/2009
<ul style="list-style-type: none">- Contributed to the development of a product for fault detection and traffic analysis of the Telco's networks.	

Academics

Universidad Tecnológica Nacional, Systems Engineering	Graduated on 07/2015
<ul style="list-style-type: none">- As the final project of my 5-year degree, developed an Android application that brings together story telling for kids and voice recognition.	

Speaking Engagements

ATAG Summit	04/2018	"An error handling strategy to reduce money loss" ...more at https://jebarsoba.github.io/2018/04/20/error-handling.html
