jebarsoba@gmail.com • jebarsoba.github.io • github.com/jebarsoba  
Buenos Aires, Argentina & Remote • Résumé current as of February 26, 2022

## Current Technology Stack

<b>Fundamentals</b>	Data structures and algorithms, OOP, TDD, SOLID, Git
<b>Programming languages</b>	JavaScript, TypeScript, HTML, CSS, C#
<b>Frontend</b>	Angular, OpenUI5, Redux, Cordova
<b>Backend</b>	Node.JS, Express, NestJS, TypeORM, Mongoose, .NET
<b>DevOps</b>	Linux, Docker, Kubernetes, Terraform, Jenkins

## Employment

- sovanta AG, Senior Software Engineer** ..... 02/2019 - Present
- Working for multiple customer-facing projects, as a Frontend, Backend or Fullstack developer, according to demand needs.
  - I'm also on the DevOps team, where I contribute to cross-cutting concerns for all projects, such as deployment, infrastructure and operations.
- Accenture, Software Developer - Associate Manager** ..... 10/2015 - 02/2019
- Rewrote in Node.JS/JavaScript a critical .NET/C# backend service, and migrated it from IaaS to an AWS Lambda based PaaS, without interrupting operations.
  - Integrated SAP IdM and Microsoft Dynamics by developing a custom interface using Rhino/JavaScript and OData when SAP did not offer a connector out-of-the-box.
  - Improved the performance of a webapp by implementing ElastiCache and ASP.NET tweaks, leading to a 60% reduction in page load times and a decrease in backend workloads.
  - Developed SAP Gateway OData services using ABAP to go-live in less than four months, without any prior ABAP experience.
  - Integrated Salesforce and SAP Finance by leveraging Azure Service Bus and developing an NServiceBus endpoint that handles 12K messages every day.
- Grupo Santillana, Software Development Team Lead** ..... 08/2009 - 10/2015
- Led the group of developers who built a BPM solution to digitize critical business processes of the publishing group.
  - Contributed to the implementation of the Scrum agile framework, playing the role of ScrumMaster.
  - Guided the adoption of software engineering practices such as TDD and Continuous Integration.
- CDA Informática - Client: Telecom, Software Developer** ..... 02/2009 - 08/2009
- Contributed to the development of a product for fault detection and traffic analysis of the Telco's networks.

## Academics

- Universidad Tecnológica Nacional, Systems Engineering** ..... Graduated on 07/2015
- As the final project of my 5-year degree, developed an Android application that brings together story telling for kids and voice recognition.

## Speaking Engagements

- ATAG Summit**                      04/2018                      “An error handling strategy to reduce money loss”
